

## Bonus: Stock Photos + Graphics + Template Resources

### General Stock Libraries

- Unsplash (free) <https://unsplash.com/>
- Pixabay (free) <https://pixabay.com/>
- Librephotos <http://librestock.com/> (40+ free stock photo sites search all in one place)
- Deposit Photos <http://depositphotos.com/> (inexpensive stock library with a big selection of images, graphic elements and video clips)
- Creative Market
  - Photos <https://creativemarket.com/photos>
  - Graphics <https://creativemarket.com/graphics>
  - Brochures (Use for ebook or workbook templates - search for ones that say Canva not Photoshop or PowerPoint) <https://creativemarket.com/templates/brochures>

### Specialty Stock Photo Libraries with feminine styled stock and mockups (paid)

- Haute Chocolate <http://www.hautechocolate.ca/>
- Create Her <http://www.createherstock.com/>
- Shay Cochrane (SC Stockshop) <http://shaycochrane.com/>
- She Bold Stock <https://www.sheboldstock.com/>

### Canva Templates (free) All Canva templates (sorted by layout category)

<https://www.canva.com/templates/> Remember that you can mix and match - choose a planner page with a book cover, or a proposal with a worksheet. Just make sure to change the font so it's consistent throughout your workbook or ebook!

### Any of these would work for an ebook:

- Worksheets <https://www.canva.com/templates/worksheets/>
- Proposals <https://www.canva.com/templates/proposals/>
- Flyers <https://www.canva.com/templates/flyers/>

- Newsletters <https://www.canva.com/templates/newsletters/>
- Presentations (My fave since each presentation template often has 10-25 page layouts in one theme - this works best with Canva Pro/Canva for Work, simply click Resize and choose 8.5x11 newsletter or flyer, then adjust layout to new size) <https://www.canva.com/templates/presentations/>

**Use these Canva templates for workbooks, worksheets or planners:**

- <https://www.canva.com/templates/lesson-plans/>
- <https://www.canva.com/templates/calendars/>
- <https://www.canva.com/templates/planners/>

**Other Resources**

- Easily find each of your brand colours (the unique colour code is called a "hex code") from your website or sales page with the Colorzilla extension - for Chrome <https://www.colorzilla.com/chrome/> or Firefox <https://www.colorzilla.com/firefox/>
- Discover which fonts were used on your website or sales page using WhatFont Chrome extension <https://chrome.google.com/webstore/detail/whatfont/jabopobgcpjmedljbcaablplmfcoqam?hl=en>
- Need more help using Canva? They have lots of tutorials. Find them here: <https://designschool.canva.com/tutorials/>
- If you are just starting out and need to choose your colours, try just picking one main colour and exploring the different colour palettes at Design-Seeds. They even have hex codes to make it easy to stay on brand! <https://www.design-seeds.com/by-color/>
